# ISC3
Inland Southern California Climate Collaborative

Recognizing the critical need for collaboration across sectors and jurisdictions in order to effectively address climate change, leaders from across the region came together to form the ISC3.

ISC3 is a diverse, cross-sectoral network of agencies, organizations, companies, and institutions working together to advance equitable solutions to create a resilient and thriving Inland Southern California in the face of climate change.

Through collective action, we strive to bolster local and regional efforts to avoid the worst effects of climate change while building resilience to the climate change impacts our communities face today — from extreme heat and droughts to wildfires and floods. We mobilize our members around a shared vision and policy agenda while providing local capacity-building support to catalyze equitable action at all scales.

SAN BERNARDINO

RIVERSIDE

IMPERIAL

KNOWLEDGE EXCHANGE

Facilitating a regular flow of information, best practices, and resources:

→ Regional climate convenings

→ Curated newsletters

→ Case studies and templates

→ Networking

REGIONAL COLLABORATION

Establishing mechanisms for effective coordination and lasting partnerships:

→ Working groups

→ Joint fundraising and implementation efforts

→ Resource sharing

→ Effective advocacy for regional needs

LEADERSHIP CULTIVATION

Empowering leadership at all levels to make climate change a top priority:

→ Leadership summits

→ Decision-making tools and support

→ Public workshops

→ Tracking and reporting systems

Will you join us in creating a resilient Inland Southern California?

ISC3 Offerings & MemberBenefits

ISC3 members receive a multitude of benefits in support of their own agency or organization's initiatives while supporting climate change mitigation and adaptation efforts throughout the region.

KNOWLEDGE EXCHANGE

Regional Convenings & Capacity-Building Trainings
ISC3 organizes regional convenings, member meetings, workshops and trainings to foster knowledge exchange, collaboration and mutual support to achieve shared regional goals.

Regional & Statewide Newsletters
Members receive curated newsletters from ISC3 (regional) and ARCCA (statewide), which include relevant news, funding opportunities, events, and resources on a regular basis.

Case Studies & Templates
ISC3 strives to accelerate climate change efforts by developing and disseminating case studies and templates, such as template language or model ordinances.

REGIONAL COLLABORATION

Project Ideation & Development Support
As new funding opportunities become available, ISC3 facilitates the identification of regional project concepts and provides coordination support for joint development efforts.

Working Groups
ISC3 provides infrastructure and staff support to facilitate working groups that address locally- and regionally-defined priorities and concerns.

State Policy Engagement
Members have the opportunity to engage with California's adaptation thought leaders to advance State policies by engaging in the development of robust comment letters through ARCCA.

LEADERSHIP CULTIVATION

Leadership Summits & Trainings
In order to raise awareness, build political support, and catalyze action, ISC3 engages local elected officials and key decision-makers by convening leadership summits and organizing targeted trainings.

Recognition as a Leader
As a member of ISC3, your organization will be recognized as a climate change leader and will have opportunities to highlight your work through the collaborative's website, events, and other channels.

Decision-Support Tools
ISC3 shares tools and resources to support decision-makers in implementing comprehensive solutions in the face of uncertainty and to establish standardized mechanisms for tracking and reporting progress.
